Intercounty Truck & Van has been operating as a Mercedes-Benz franchise for over 12 years, providing a full support solution through commercial vehicle dealerships. A new branch was required in Boston which Michael Nugent subsequently received the M&E Contract for, consisting of full mechanical and electrical installation works.

The Mechanical installations included Heating works, Ventilation works, Domestic plumbing works, Drainage works, Oil distribution and collection, Compressed air systems and the installation of BMS control systems.

The Electrical Installation included the Installation of sub-mains cabling, main switchboard, security equipment and fire systems by specialist sub contractor G4S, lightning protection by specialist sub contractor Omega, structured cabling, general and emergency lighting, external lighting, general power, BMS control and power cabling to mechanical plant. Finally the contract incorporated the inspection, testing and commissioning.
