COMPLETION Feb 2011

The Adult Mental Health Unit at Letterkenny General Hospital combines Inpatient care and a Community Crisis Team Unit. Strategically designed, the building offers 34 comfortable, private bedrooms, along with day areas ranging in size, shape and ambiance to create effective spaces for treatment. Secure courtyards provide a place for exercise and fresh air, while facilities for older people include quiet zones and viewing areas to other activities.

Michael Nugent Ltd provided full mechanical services during its construction, including solar water heating installation, medical gas supplies, pneumatic tube installation and soil and waste disposal. All LPHW heating, plumbing, sanitation and ventilation amenities were also installed.
